

Shown here: R-8, 2" Thick Thermo-Block Insulated Curtain Wall

Our customer needed to quickly install a temperature controlled space to ensure product quality and regulatory compliance for select products. The **Thermo-Block Insulated Curtain Wall** from AmCraft allowed for a fast and cost effective implementation, while requiring minimal construction or structural changes to the facility. The ambient temperature outside of their new controlled space fluctuates between 60° F and 85° F depending on the time of year and they are able to control the temperature within the enclosed area at 60°- 65° F.

AmCraft's Single Layer Industrial Curtain Walls are also a cost effective solution used by many Logistics companies when simply dividing a space is the main objective
